

In-person electronic notarization (IPEN)

IPEN blends the convenience of a completely digital, paperless closing method with the warmth and personal engagement of an in-person ceremony, which can result in a quicker, more secure experience for both signers and closing agents.

Exceptional speed and precision at the closing table

Less busywork

Eliminate tedious tasks like printing, scanning, and manual document handling.

Happier customers

Offer a quick and easy electronic signing with a finger tap or mouse click.

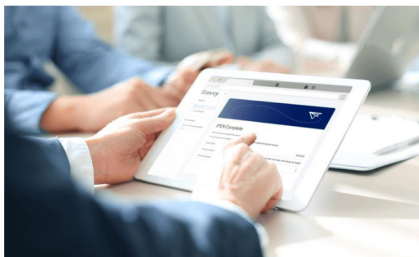

Improved accuracy

Reduce the risk of missed documents or signatures, avoiding costly remediation.

Greater security

Digital safeguards through ID verification, tamper-sealed documents, and audit trails.

Hardware versatility

Stavvy's IPEN enables closing agents to select their preferred technology, offering seamless compatibility with a wide array of mobile and desktop devices that support internet connectivity, a web browser, and a tablet-sized screen or larger that all participants can share.

Flexible notary options

Expand market presence and increase capacity through a Stavvy integrated mobile notary signing service equipped for IPEN.
